

XMILE is the world's first proven enzyme-based fuel additive that improves fuel efficiency while lowering costs and emissions. Its nano hydrocarbon enzymes act as biocatalysts, enhancing fuel combustion, reducing carbon deposits and black smoke, preventing fuel contamination, and keeping fuel systems clean.

XMILE BENEFITS

- Up to 7% fuel savings
- 30% maintenance savings
- 7% CO2 reduction
- Returns over 300%
- 25% CO reduction
- 6% NOx reduction

Certifications

Queen's University Belfast · Renal Cimatec · Intertek · SGS · Lean & Green · enea · Repsol · Viswalab · TÜV SÜD
